

Prepare your Erasmus + grant application!

To make a good chance of getting an Erasmus + grant, proper preparation is of utmost importance! In recent years, the granting of subsidies is subject to strict quality control. For a successful grant application, follow the steps outlined below for a good preparation:

Key Action 1: Mobility

Mobility to give individuals the chance to improve their competences, knowledge and skills.

Examples:

- Students may do their internship or a part of their study in Europe during their vocational training.
- Professionals in the MBO could learn a period (through training or job shadowing) or working with European companies or educational institutions or other relevant organizations.

Key Action 2: Strategic Partnerships

Institutional cooperation for developing, transferring and implementing innovative approaches. Through European strategic cooperation, partners can solve training and development issues together.

Examples:

- Education institutions and enterprises cooperate to establish common training programs and educational and approaches.
- Education institutions cooperate to improve the quality of their education. Good examples are shared.

Roadmap for grant applications:

- | | |
|--|---------------------|
| 1. Consider a project idea that complies with your institution's policy, national & international priorities and Erasmus + policy; | September - October |
| 2. Find suitable partners at home and abroad with relevant knowledge and experience; | October - November |
| 3. Put your plans on paper: show the need for your plan and show how you can achieve sustainable impacts; | November - December |
| 4. Present your project idea to the National Agency for Advice and Support; | November - January |
| 5. Schedule your project proposal and submit it; | February |

Roadmap for project execution:

6. Run your project after approval, pay attention to the procedures mentioned in the programme guide;
7. Distribute your results at home and abroad with stakeholders.
